DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Levatter (4,891,818). Levatter discloses the claimed invention. Note figures 5 and 6 and col. 8 line 45 through col. 9 line 60, which show and discuss the bearing apparatus including a cylindrical bearing sleeve and a bearing shaft. For rotatably and removably retaining the bearing shaft in the bearing sleeve, Levatter teaches an O-ring. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have a coil spring since the examiner takes Official Notice of the equivalence of O-ring and coil spring for their use in the laser art and the selection of any of these known equivalents to retaining means would be within the level of ordinary skill in the art.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Quyen P. Leung whose telephone number is (703) 308-0545. The examiner can normally be reached on 8:30-5:00, M-F.
